Question 1

Revisit Later

How to Attempt?

All Digits Count

Write a function to find the count of ALL digits in a given number N. The number will be passed to the function as an input parameter of type int.

Assumption: The input number will be a positive integer number ≥ 1 and ≤ 25000 .

For e.g.

If the given number is 292, the function should return 3 because there are 3 digits in this number

If the given number is 1015, the function should return 4 because there are 4 digits in this number

JAVA8

Compiler: Java - 1.8

```
1  import java.io.*;
2  import java.util.*;
3
4  // Read only region start
5  class UserMainCode
6  {
7
8      public int allDigitsCount(int input1){
9          // Read only region end
10         // Write code here...
11         String str=Integer.toString(input1);
12         return str.length();
13     }
14 }
```
